## UCONNECT

UConnect is a complete Hybrid Wireless Connection Management Platform to Discover, Configure, Control and Connect 5G/4G/3G and WIFI networks. UConnect has the option to integrate OMA-DM-based UManage Device management.

## UMANAGE

Umanage is a highly customizable, Open Mobile Alliance (OMA) standards-based Device management Client Solution that enables Firmware and application management ( query, update, configuration ) of mobile devices Over-the-Air(OTA).

## ANDSF

The mobility manager is a selective, user-defined and operator assisted Wi-Fi Offload solution that enables 4G network optimization through intelligent network access selection. Built on 3GPP standards, the UMobility Manager complies with ANDSF and OMA standards for device management

## SPANFI

SpanFi allows managing Wi-Fi from anywhere. This is a vendor-neutral stack and can be deployed on public cloud or on-prem infrastructure Spanidea's solution with 802.11ax/ac AP family includes tri/dual-radio to meet the most challenging client performance and density requirements.

## COMPANY HISTORY

Established  
2011

Headquarters  
California

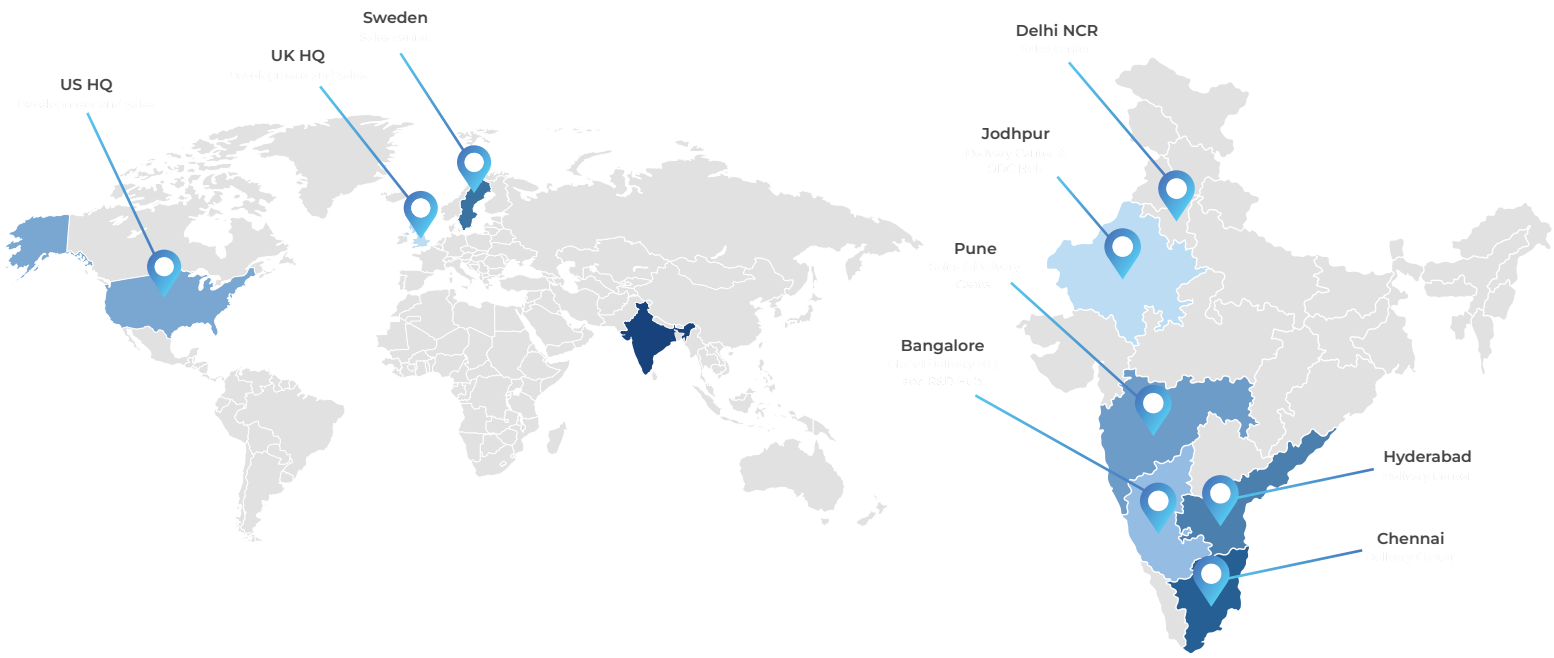

Employees  
1200+

Clients served globally  
100+

## ACADEMIC COLLABORATIONS

IIT Jodhpur for AI/ML,  
IIIT Bangalore and  
IIT Roorkee for 5G research
