SOLUTIONS

Spanidea is a trusted technology partner delivering customized and innovative solutions and supporting Fortune 500 Mid-size, startups. Across the product engineering and digital transformation

UCONNECT

UConnect is an advanced Intelligent Cross-Platform Connection Manager that revolutionizes the way devices connect and communicate in today's interconnected world. It provides a seamless and intelligent solution for managing and optimizing cross-platform connections across various devices, networks, and applications.

UMANAGE

UManage is a comprehensive device management solution designed to simplify and streamline the management of devices in various industries and sectors. It provides a centralized platform for efficient control, configuration, monitoring, and maintenance of devices, ensuring optimal performance, security, and productivity.

ANDSF

ANDSF (Access Network Discovery and Selection Function) is a network technology that enables intelligent network selection and seamless handover between different access networks for mobile devices. It allows devices to automatically connect to the most suitable network based on factors such as signal strength, network availability, quality of service, and user preferences.

UCWMP

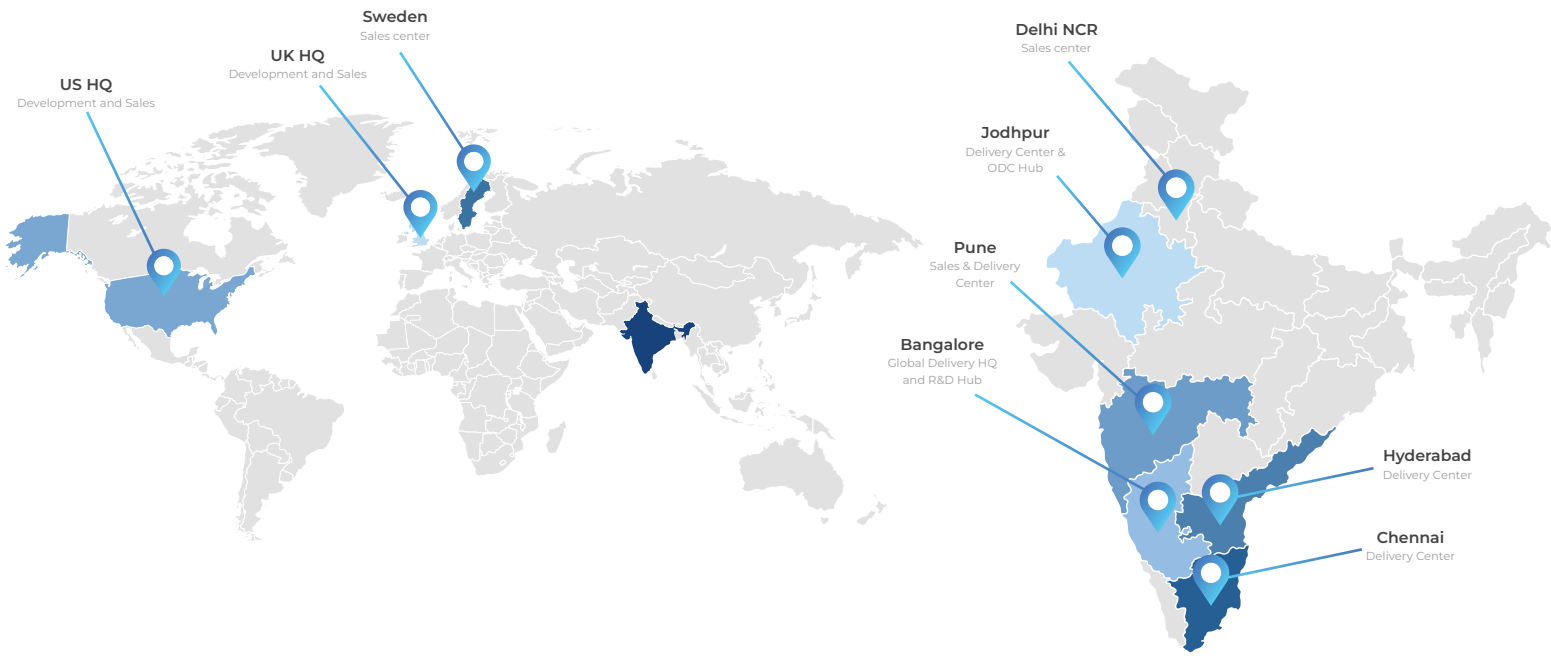

UCWMP (CPE WAN Management Protocol) is a comprehensive solution designed to simplify and optimize the management of Customer Premises Equipment (CPE) and Wide Area Network (WAN) connections. It provides a centralized platform for service providers and businesses to efficiently configure, monitor, and troubleshoot their network infrastructure.
