About Us

Spanidea is a global technology and engineering solutions company that enables enterprise transformation through innovation, agility, and deep technical expertise. Headquartered in the USA with a presence across India and the UK, we bring together the best of system engineering and digital capabilities to help businesses stay ahead in an increasingly connected and intelligent world. Our approach blends robust engineering with scalable digital delivery, empowering organizations to modernize, optimize, and grow.

With a strong foundation in product innovation, proven delivery models, and a passionate, cross-functional team, Spanidea delivers outcomes that matter. We partner with global enterprises as a trusted technology ally, solving complex challenges, accelerating time to market, and co-creating resilient, future-ready solutions.

Our Core Competencies

System Engineering

- Embedded Systems & Firmware Engineering
- Silicon Engineering & Hardware Design
- IoT Engineering & Smart Connectivity
- 5G & Next-Gen Wireless Services
- Edge AI & Intelligent Systems
- Networking & Wi-Fi Solutions
- OpenSync

Digital Solutions

- Application Development and Modernization
- Cloud Services
- Artificial Intelligence and Machine Learning
- Cybersecurity Services
- Data & Analytics
- Digital Transformation and Strategy Consulting

Recognized & Certified

Tech30 Winner	StartupCity Recognition
TechSparks Winner	Marico Innovation Foundation Honoree
Red Herring Asia Top 100	
QPrize Global Entrepreneur	ISO Certified Organization

Strategic Technology Alliances

We are a preferred technology partner with:

Industries We Serve

Automotive	**BFSI**	**Healthcare & Life Sciences**
Retail & Consumer Electronics	**Industrial Automation & Manufacturing**	**Telecom & Communication Media**
Clean & Renewable Energy	**Hi-Tech & Smart Devices**	**Public sector**

Innovative Solutions by Spanidea

UConnect

Seamless device connectivity and control platform designed for smart homes, automotive, and industrial IoT use cases.

UManage

Unified management system for monitoring and configuring connected devices, ensuring reliable performance and security.

ANDSF

Access Network Discovery and Selection Function to optimize mobile device connectivity across Wi-Fi and cellular networks.

UCWMP

Unified Client Wi-Fi Management Platform enabling intelligent Wi-Fi roaming, configuration, and optimization across client devices.

SPANFI

It is a vendor-neutral 802.11ax/ac stack enabling secure, high-performance, reliable wireless connectivity with tri/dual-radio.

Why Spanidea

- End-to-End Engineering Solutions
- Flexible Engagement & Delivery Models
- Rapid Resource Turnaround
- Domain-Specific Expertise
- Strong R&D and IP Development Capabilities
- Scalable & Future-Proof Solutions
- Trusted by Global Enterprises

Impact Delivered

- Enabled next-gen Wi-Fi features for global chipset manufacturer
- Designed automotive infotainment systems for top OEMs
- Deployed smart healthcare monitoring in hospitals
- Developed cloud-native enterprise apps for financial clients
- Optimized industrial operations through AI-powered analytics
